

Tip a ScRxipt

Funds That Help People Stay Alive & Well

ABOUT US

Tip a ScRxipt was founded in 2020 by our CEO Chad Johnson, who was inspired to find a better way to help people pay for costly prescription medications after his mother lost her retiree insurance and faced skyrocketing out-of-pocket costs. After sharing the idea and participating in various pitch competitions, Chad and his mother had the opportunity to compete on the ABC show, “Project Pitch It” where Tip a ScRxipt won first place.

After launching its first debit card pilot in 2021 to help selected participants pay for their out-of-pocket prescription medications, Tip a ScRxipt raised venture capital to expand their capacity to help more people pay for healthcare and other expenses they struggle to pay on their own.

WHAT WE DO

Controlled-Spending-as-a-Service (CSaaS): Tip a ScRxipt provides a controlled-expense debit card issuing platform that enables our customers (e.g., employers, healthcare providers, health insurance plans, pharmaceutical companies, foundations etc) to control how and where dollars they provide are spent.

Our controlled-expense debit cards are used to help participants you choose cover out-of-pocket (OOP) healthcare and wellness expenses through a Health Reimbursement Arrangement (HRA) or Lifestyle Spending Account (LSA). Our debit cards can be customized for any allowed expense and restricted by any desired merchant category code (MCC) or individual merchant ID.

THE PROBLEMS WE FACE

Healthcare costs are rising well beyond affordability. 1 in 5 people (58 million American adults) report difficulty in paying for out-of-pocket (OOP) healthcare expenses. At present, many in this category have to decide between paying for medical expenses or basic necessities and they forgo getting needed care. This leads to \$528 billion in healthcare consequences, unfilled prescriptions, hospital readmissions, ER visits, etc.

Our customers want to have guard rails around the funds they provide to help people pay for needed expenses.

THE BENEFITS YOU WILL SEE

Control your cash flow with our notional accounts (funds you provide are not debited from your account until a card transaction occurs)

Save time by eliminating manual claims and reimbursements with a card exclusive solution

Prevent misuse by setting spending limits and control when and where funds can be spent

Track card activity in real time and generate customized reports

HOW DOES IT WORK?

- 01** Identify the debit card program you will use (Health Reimbursement Arrangement - HRA or Lifestyle Spending Account - LSA)
- 02** Customize card program (dollar amount provided, approved merchants, program period)
- 03** Import card user information into our system and mail debit cards
- 04** Track activity and know you are helping people by funding every card swipe at merchants you approve

PRICING

+

Our pricing is only \$3 per person per month (minimum \$200/mo)

Includes debit card, online portal and mobile app for debit card user.

Includes online portal, role based user access and training for customers.
